

CROWN LENGTHENING COSTA RICA: BEAUTY, TALENT, AND HEALTHCARE

In Costa Rica, healthcare with the highest standards, natural beauty, and talent come together to offer the best services to the rest of the world. Dental medicine and dental care are part of the medical offer that the country makes available to thousands of patients every year.

WHAT IS A CROWN LENGTHENING?

Crown lengthening is a surgical technique that involves reshaping the gum contour so that the visible surface of the tooth is larger.

TESTIMONIAL

"It's been 2 months since my provisional treatment and there isn't almost anything I cannot eat. In the past I had to restrict myself, now I have to constantly remind myself that I can enjoy all kinds of food."

Ron Jones, International Patient

TEETH WHITENING COSTA RICA, TECHNOLOGY FOR HEALTH AT YOUR FINGERTIPS

Dentists with international and first level training offer both health and aesthetic services in Costa Rica. They mix talent with the latest technology and advanced techniques, offering treatments sought by thousands of people around the world every year.

WHAT IS TEETH WHITENING?

Teeth whitening is a treatment used to remove blemishes and discolorations in the tooth surface. The most common treatment is performed with gel applied directly to the teeth. This gel contains hydrogen peroxide, and the dentist uses specialized light or laser to activate it and generate a more effective whitening outcome.

TESTIMONIAL

Having the dental work I needed in Costa Rica is probably one of the best healthcare decisions I've made in recent decades."

Paul Wright

PORCELAIN VENEERS COSTA RICA, WHERE ART AND HEALTH MEET

The talent of our dentists is accompanied by the best preparation. In Costa Rica we have more than 4,000 active dentists, a large majority of which have received training in state-of-the-art medical centers in the United States and Europe.

WHAT IS A PORCELAIN VENEER?

A porcelain veneer is a thin cover, designed to be set over the tooth to improve its appearance. They are used to change the color, shape, size, and length of the pieces, making them stronger and more durable.

Porcelain veneers

TESTIMONIAL

"The treatment I got is called full upper arch rehabilitation, which included veneers and dental crowns. This treatment would have been extremely expensive in Canada or the US. In Costa Rica, it cost me much less, so I was able to afford tickets, transportation, food, lodging, and entertainment, without mentioning I stayed for a nice 10 day vacation in paradise, watching beautiful birds and monkeys."

Brenda Basinger, International Patient
