

# THIS IS NOT JUST ANY LETTER

An entire country writes to you—one that dreamed differently and became a reference for the world.

We're not here to lecture you, but to share what makes us unique: **our Natural Intelligence**—a way of understanding the world, connecting with nature, and facing challenges with our own essence.

**Intelligence is charting our own path.**

And in Costa Rica, it's natural to get lost in the whisper of the forest and the song of our rivers.

Here, peace is a tradition, and respect is the foundation of progress.

**Intelligence is caring for what gives us life.**

Here, it's natural to protect a biodiversity that amazes the world. We have no army, but we are guardians of nature.

**Intelligence is thinking about the future.**

And here, it's natural to lead sustainably, committed to climate action and the smiles of those yet to be born.

**Intelligence is valuing our people.**

In Costa Rica, our greatest treasure is passionate, united people. Many came for tourism or business—and stayed for the way we live and think.

**Intelligence is learning from our past and looking hopefully towards the future.**

You'll naturally see brave decision-making, purpose-driven businesses, and an unwavering love for this land and its people.

It's time to say goodbye, but remember, we hand over a better planet.

# NOW IT'S YOUR TURN

to carry this way of  
thinking into the future.  
*With all our love and hope,*

*essential*  
**COSTA  
RICA**
